Material Property Datasheet

TRESPA® METEON®

Decorative high-pressure compact laminates according to EN 438-6:2005 with thicknesses of 6 mm (\pm ½ in) or greater for outdoor applications. Sheets consisting of layers of wood-based fibres (paper and/or wood) impregnated with thermosetting resins and surface layer(s) on one or both sides, having decorative colours or designs. A transparent topcoat is added to the surface layer(s) and cured by Trespor's unique in-house technology Electron Beam Curing (EBC), to enhance weather and light protecting properties. These components are bonded together with simultaneous application of heat (\geq 150° C / \geq 302° F) and high specific pressure (> 7 MPa) to obtain a homogeneous non-porous material with increased density and integral decorative surface. They are available in the Standard grade (EDS; not available in all worldwide areas) and in the Fire-Retardant grade (EDF).

Trespa® Meteon® is engineered for vertical exterior wall coverings such as façade cladding, balcony panelling as well as horizontal exterior ceiling applications (Trespa® Meteon® Curved Elements are only suitable for vertical exterior wall coverings). For other applications please contact your local Trespa representative.

Storage, machining, mounting and cleaning instructions are provided by the manufacturer.

☐ All data are related to the products mentioned in the Trespa® Meteon® standard delivery programme.

☐ Not valid for following colours: A04.0.1/A10.1.8/A20.2.3/A17.3.5/A12.3.7.

For other applications/colours such as project colours, please contact your local Trespa representative.

☐ For more information on Delta E values, please contact the Technical Service Department of Trespa North America at 1-800-487-3772.

☐ Laboratory test results are not intended to represent hazards that may be present under actual fire conditions.

For multi-story applications, where local or national building codes may require full-scale fire testing in accordance with NFPA 285(U.S.) or Can/ULC-S134 (Canada), please visit our website www.trespa.info or contact the Technical Service Department of Trespa North America at 1-800-487-3772 for installation information.
